

Conflict: Root Causes, Consequences, and Solutions for the Future

(PPHA 38740-01)

Course Information

University of Chicago, Harris School
Winter 2017
Class time: Friday 9-11:50 am
Room: 140C

Instructor: Oeindrila Dube (odube@uchicago.edu)
Office Hours: Wednesday 4:30-6 pm
Office location: Harris School, 303A
Teaching Assistant: Jose Hernandez Chong Cuy (josehernandez@uchicago.edu)

Course Objectives

The goals of this course are to introduce students to key concepts in the study of conflict, and to develop the policy analysis skills needed to understand and assess key arguments advanced in this arena. Effective policymakers today are consumers of data science, with an ability to discern what makes empirical evidence compelling. Thus a major emphasis of the course will be learning how to think critically about empirical evidence, and to develop a better understanding of common methodologies used in empirical analysis, such as the use of fixed effects, differences-in-differences research designs, and instrumental variables estimation. This methodological emphasis will occur through the examination of fundamental topics in conflict. Drawing on economics and political science, as well as psychology, we will examine the role of economic shocks and ethnic divisions on civil war. We will also discern whether similar factors explain the rise of terrorism. In addition, we will study the consequences of conflict on socio-economic development, and examine the role of foreign aid and post-conflict reconciliation in helping countries recover from conflict.

Course Requirements

All students must complete 2 memo-style written assignments. In these assignments, you will be required to critically analyze the content of either one or two academic papers, and argue whether the author has presented sufficient evidence to support the conclusion and policy implication advanced in the paper. You will be asked specifically to assess both the conceptual claim and the validity of the empirical methodology in forming this assessment. Memos should be typed, and should not exceed 3 pages in length (double-spaced, using 12 point font, 1-inch margins all

around). Your grades on the written assignments will be based on both the quality of your writing as well as the clarity and content of your points.

Note: These should be emailed to me and the TA by 5 pm on the date they are due. Each day an assignment is late, a full grade is deducted from the assignment. Starting from 30 minutes after the official deadline, your assignment is considered to be a day late, and two days late 24 hours after the official deadline, etc.

All students will also be required to do an in-class presentation, 20-30 minutes in length. You will be asked to select one of the papers designated under the student presentation section of each topic in the syllabus below, and present a brief overview, followed by an extensive assessment of the paper, in which you comment on the nature of the data, the empirical strategy and analysis, and offer suggestions for what other evidence would be needed to support the conclusion of the paper. The goal of the presentation is to develop the skills needed to translate the content of an academic paper into simple terms; critically analyze the content; and effectively communicate this analysis to an audience. (See presentation guidance for further details).

Note: The presentation slides are due in to me and the TA by **Wednesday, 5 pm**, the week in which you present.

Finally, you will be required to take an in-class final exam. The time and date for the exam will be made available shortly.

Course Grading

30% - 2 Written Memo Assignments (15% each)
20% - Class Presentation
10% - Class Participation on non-presentation days
40% - In-class Final Exam

Texts

All articles will be uploaded on chalk. Links are also provided below for most readings. Links such as www.jstor.org may only work from an on-campus computer or IP address. Scholar.google.com is generally another good way of locating references.

It is expected that you do all the readings before class, including the papers listed under the student presentation sections. The presentations are meant to be interactive with all students in the class participating, and not just the presenter. Thus having all students read the papers is essential for having quality discussion during class.
